

Solution Profile

Switchgear Upgrade

Committed to providing cost-effective solutions that make you more effective!

<u>Client Type</u>	Hydro Electric Dam
<u>Challenge/Issue</u>	Design and install replacement breakers inside unique pre-fabricated location with limited access and space availability
<u>Equipment Involved</u>	Medium voltage field generator circuit breaker
<u>Solution</u>	Design, build and install new units
<u>Scope/Deliverables</u>	Provide design engineering for replacement breakers to fit existing conditions with limited modification to buswork and breaker cradles.
<u>Timeframe:</u>	9 months for the total project encompassing 3 generating units—outage time for each generation unit limited to average of 4 days, which is minimal
